

### Protect Your High-Value & High-Risk Freight Shipments with an Experienced Load Security Partner

When you need improved security to protect your highest value and highest risk loads, you've come to the right place. LiVe Logistics clients, from Fortune 500 consumer electronics manufacturers and large telecom companies to small business owners, retailers and more, rely on us to protect their highest, at-risk loads. Procedures designed to reduce risk from both internal and external forces were developed through customer interaction and market intelligence.

Not all high-value loads are high-risk shipments, so LiVe Logistics implements freight solutions customized for each situation. Just as every customer may not need the same level of security, we've found that customer loads may also require various levels of risk mitigation and customized shipment procedures are based on changing risk levels. Risk mitigation is not a one-size-fits-all solution and that's why listening to customer concerns also helps us deploy the best cost solution.

**Don't Let This Happen to You:** **over \$200,000 worth of dimes was stolen** from a dry van after the driver left the trailer unattended in a parking lot overnight. For high value, high risk loads, LiVe Logistics can provide two-driver teams, so your trailers never have to stop other than for gas. Optional security details performed by former special forces personnel are also available to accompany your loads for added protection.

### Multi-Point Security

LiVe Logistics utilizes a multi-point security strategy to protect high-value loads for a wide variety shippers. Our security solutions include options for partial and full escorts, covert tracking, and geofencing – and we continuously evaluate new technology and procedures that provide additional protection.

As part of Live's ongoing commitment to **lowering your freight total cost of ownership (TCO)**, we offer affordable security measures that often cost 0.5% to 2% of the value of the shipment.

## High Value Freight Shipment Service

**Please note:** LiVe does not publicly publish the details of our multi-point security system, as it could compromise the safety of our current shipments by providing potential criminals with a blueprint for thwarting security efforts. We will work with your transportation team to determine the right solution mix, so contact our team to learn how we can help protect your shipments from theft.

### Insurance as Additional Protection

Many common shipments may carry \$75,000 to \$100,000 of cargo liability, so losses above that are the shippers responsibility even when the carrier is negligent. LiVe Logistics cargo liability covers loads valued in the millions.

Additionally, LiVe can provide the option of "all risk insurance" to cover load values not covered by standard cargo liability policies should there be losses of any kind (not just carrier negligence) – and we often get better rates than even our largest clients. Whatever you need, LiVe will work closely with you to determine the right insurance coverage for your high value loads.

### Get Started Today

Though it's not uncommon for a shipper to contact us after they've had an issue or sometimes several issues, please contact us before you've had an incident that we could have helped avoid. Working with our experienced team decreases your risk of lost or stolen inventory while providing a sense of security along the way through regular updates. You may be able to ship more high-value goods per trailer based on our coverage or even setup a convoy of several high-value loads that are all coordinated by our team.

Please share your biggest shipment security challenges, and we'll provide you with a quote and listen so we can help take the pain out of your supply chain.
